

## HEAVY WEIGHT COMPACTOR

This plate is a hard hitting but user friendly machine in the heavy weight class.

PCX20/50 has outstanding compaction features and is the heaviest forward plate compactor in the range.

POWERED by **HONDA**

## ADVANTAGES

- Heavy weight compactor for use on gravel and dirt only.
- The optimum vibratory plate for finishing or patching a surface
- Highest degree of operator comfort: patented vibration neutralization of the operating handle
- Wear and fracture resistant cast base plate, even during continuous load applications, manufactured out of extremely resistant cast iron (GJS-700)
- The sturdy protective frame makes this plate resistant to rough treatment or mechanical shocks
- Powered by Honda
- Optional detachable wheel kit available
