SPRAYERS and DUSTERS

Whatever the need, Hudson has a sprayer for you!

Porta-Spray™ and Water Wagon™ — No carrying or lifting. Easy to pull anywhere!

A. Extra-long, non-kinking hose. Long brass spray wand; adjustable nozzle. Unique design with low center of gravity helps prevent tipping. Heavy-duty, translucent poly tank.

B. Water Wagon has a soft shower spray head. Use for camping to shower or wash the dishes; take to the beach to cool the sand; wash the dog; cool off after a game—use anywhere you need pressurized water!

Models 62130E and 62133E. For Europe. Same as 62130 and 62133 except with pressure release valve.

Container Quantity

Our good Leader® poly sprayers — For occasional use around the garden.

Good sprayer for the budget-minded. The polyethylene tanks are translucent for viewing the liquid level. Massive poly handle on durable poly pump. Poly shut-off locks on and off. Our exclusive Pic-A-Pattern™ cone and fan spray pattern nozzles provide added versatility.

Unlike "bottle" sprayers others make, most Hudson sprayers have a funnel top which makes filling much easier.

Mosquitoes can be deadly. Help control them around your house, yard and patio.

Mosquitoes are the carriers of West Nile Virus, St. Louis Encephalitis, Dengue Fever, Malaria, Yellow Fever and other diseases such as Dog Heart worm. Here's how to help eliminate them.

1. Mosquitoes need water to breed. Keep your yard and area around your house free of standing water that can collect in empty flower pots, old tires or pails. Keep rain gutters clear. Change water in bird bath at least four times a week.
2. Keep your lawn and gardens trimmed and neat. Tall grass and weeds can be mosquito hiding places.
3. **SPRAY** bushes and other plants, making sure you spray under the leaves. Spray under lawn furniture, under your eaves, on side of house and in window wells. Spray during the day when mosquitoes use these places to rest and hide.
4. For the most effective results, always read and follow exactly the directions on spray material container!

Bak-Pak® sprayers are ideal for spraying larger areas and for professional use.

Bak-Pak sprayers are great solution for larger areas and for frequent use. All feature powerful piston pump that builds pressure with easy strokes. Poly units can be carried and pumped left or right handed. All have power sprayer grade hose and heavy duty brass spray wand. Poly units have discharge on top so there won't be any leaking. Comfortable, chemical-resistant carrying systems.

Tips for keeping harmful insects away . . .

- Dust early in the morning when there is dew on your plants. The moist dew will help the dust adhere to the leaves.
- Spray in the late afternoon when there is less wind and when the sun won't evaporate the spray application.
- Always read and follow exactly the directions on the spray material container.

Walk 'n' Water™ spray wand with coiled hose. Easy way to mist plants inside or out.

Connects to outside spigot, garden hose or inside sink faucet with included adapter. Recoil hose is 45-feet (13.7 m) long. Ideal for watering hanging baskets, house plants and patio and porch gardens. Locking on/off. With 18-inch (46 cm) brass spray wand. Nozzle adjusts from fine mist to long stream. Available in individual 4-color carton or in a clear clam that's good for display in live plant area. Both are shipped 10 per shelf displayer. (Each style can also be hung on a hook.)

Available one each, no displayer included. Weights and measures are for standard multiple pack, not individual unit. Container quantity is unit total.

Easily spray tall shrubs and small trees with Hudson Trombone® sprayers.

Ideal for fruit trees, hedges and tall bushes. With the Trombone sprayer you just drop the hose in a bucket of spray material and with easy strokes, spray approximately 30 feet (9 m). High pressure builds up in barrel of sprayer. Nozzle adjusts to very fine mist so sprayer is great for low-growing plants also. Two models. One has larger barrel and grips. Each model is packed in four-color carton that hangs.

Regulator™ sprayers have CFValve™ — Maintain even pressure and constant flow rate!

Calibration and precise application is difficult because of varying tank pressures. Starting, the spray is mist-like. As pressure falls, droplets become larger. The solution is a Regulator sprayer. Regardless of the number of pump strokes, the pressure at the nozzle is constant because of the CFValve. On compression sprayers it is set at 14.5 psi (1.0 bar) and on the Bak-Pak® sprayer it is set at 21 psi (1.5 bar.) The nozzle pressure stays constant until the pressure in the tank falls below the set amount, then spray shuts off. With a Regulator sprayer there is less chance of the spray drifting which means lower chemical usage, resulting in savings of up to 24%! Viton® seals.

Spray Thick™
Up to 35% solids!

Versatile drum pump sprayer does the job, big or small. Sprays thick or thin materials.

Efficient power sprayer features unique closed liquid system with powerful piston pump. Easily attaches to 55-gal (208 l) drum or 5-gal (19 l) pail. 2-piece suction and agitation discharge pipes. 3.5 hp engine adjustable for volume and pressure. Five foot (1.5 m) hose connected to both suction and discharge ends allows easier cleaning and flushing of spray gun and wand. Closed system so you can keep material in line between jobs. Includes pump, spray gun with 18-inch (46 cm) straight spray wand and a 30-inch (76 cm) curved wand, two TeeJet® brass nozzle assemblies, 30 feet (9 m) spray hose and a pump maintenance kit.

All parts i□

Ultra Low Volume applicator covers extremely large areas with very little spray material.

This is a true ULV sprayer, not a mist blower. Motor and large, specially designed fan generate powerful, high volume air stream that drives micron size (18 - 75) droplets. Covers swath up to 75 feet (23 m) wide and 50 feet (15 m) high! Uses concentrated pesticide so there is no water mixing or carrying required. Ideal for use in orchards and groves, inside large warehouses, feedlots, etc. Also ideal for mosquito control for public health. Easily carried on applicator's back. Optional parts kit for fast, easy, in-the-field servicing.

Model	Pack	US Gal	Litre	Lbs	kg	Cu ft	Cu m	20'	40'	40' HC	UPC-A

Hudson Fog® electric atomizer sprayers can be used to control pests inside and out.

These ultra low volume sprayers produce small, 22-50 micron size droplets seen as a mist that hangs in the air to kill flying insects including mosquitoes. Especially useful wherever gasoline engine exhaust would be a problem. These units can spray a wide variety of chemicals including wettable powders. Concentrates can be sprayed directly or mixed with water. Perfect for inside pest control or controlling mold and mildew, smoke odors, etc., because mist penetrates cracks and crevices. "A" has a hose and is ideal for outside pest control. Sprays swath up to 14 feet (4 m.) "B" is for inside use. Coverage up to 100 feet (31 m.)

Spray Thick™
Up to 35% solids!

Industro® power sprayer for large area spraying. Easily wheeled to the job.

Holds 12 gallons (45 l) and sprays up to 30 feet (9 m.) Handles many materials too thick for hand sprayers. Ideal for spraying cures on parking garage floors, large areas of turf, etc. Heavy-duty stainless steel tank with bottom drain, pneumatic tires. Piston pump delivers constant volume and pressure. Mechanical and jet agitation keeps chemicals mixed and in solution. 20 feet (6 m) of flexible hose and adjustable spray gun.
